

Swedish puppet expert. report for the festival.

“From Canada Quebec came a very special performance. Magali Chouinard is a multiculturalist who for thirty years worked with various artistic techniques; drawing, sculpture, animation, until she in 2008 in the puppet theater found her ultimate artistic expression. It's a breathtaking performance with film sequences and one woman theater with puppets like human and animal figures, all without sound. You get an archaic sense of approaching the creation core. The performance gives associations to Egyptian religion that explored the different aspects of femininity by renaming them to different goddess names. In the performance, symbols / powers are created for the characteristics of the female being as the creator of the Universe and bearer of life. The play "Nomad Soul" is an enchanting performance by Theater Magali Chouinard.”
